Skills: HTML / CSS / SASS / SCSS / JavaScript / Responsive Web Design / NodeJs / MySQL / Git /
ReactJS / TypeScript / NextJS / PHP / Rest API

WORK EXPERIENCE

ClinicSoftware   **Location: UK / London (Remote)**
IT Support and Web Programming Services   *Current work*
I help businesses build and improve their websites by creating and refining web pages with HTML, CSS,
and JavaScript. I also edit email templates to make them more effective and visually appealing. On top of
that, I work with WordPress—setting up themes, configuring plugins, and optimizing sites for a better
user experience. I also create automation scripts to streamline processes and save time. My goal is to
make websites look great, work smoothly, and help businesses succeed online.

Eatery Club   **Location: Ukraine / Odessa (On-Site)**
Frontend Developer   *Dates: november 2021 - may 2022*
In November 2021, I started as an intern at Eatery Club in Odesa, Ukraine. My role focused on
developing the user interface of their product using HTML, CSS, JavaScript, and React.js. This was my
first commercial development experience, where I improved my programming skills and learned to work
with Jira, as well as handle Git merge conflicts. I had the opportunity to work under a mentor who guided
me through real-world development practices and industry workflows.

EDUCATION

Technical University of Cluj Napoca   **Location: Romania / Cluj-Napoca**
Bachelor's degree   *Graduation Date: June 2026*
    Industrial Engineering and Robotics

ABOUT ME

I am a solution-oriented Software Developer, lifelong learner, and multilingual professional with a
passion for building dynamic, user-friendly web applications. I enjoy solving complex challenges and am
motivated by the impact that technology can have on both individual users and the global community.
